

Settlement patterns in relation to flow changes

dr. Carlos Bento

Museu da Historia Natural

Changes in settlement patterns (in adaptation to loss of regular annual floods) result in higher social and economic costs during very large (uncontrollable) floods

Impacto negativos da invasão humana áreas de inundações resultando em danos severos e obriga reassentamento das populações durante as grandes cheias.

Waterbird biodiversity in relation to flow changes

dr. Carlos Bento

Museu da Historia Natural

Devido a grande concentração de aves aquáticas o Delta foi considerada uma area RAMSAR pela de Moçambique.

A wooden sign for Zambeze Delta Safaris is mounted on a rustic wooden frame. The sign is a horizontal plank of weathered wood with the words "ZAMBEZE DELTA SAFARIS" painted in white, block letters. Above the sign, a large animal skull with prominent, curved horns is mounted on a horizontal log. The entire structure is set against a backdrop of dense green foliage and trees. A thatched roof is visible in the lower-left corner.

ZAMBEZE DELTA SAFARIS
