						forester working at the CEF research station at Sussundenga and as I said the reason for its introduction was that it was considered a good plant for bees. It had already escaped around the CEF station in Sussundenga in 1991. Interestingly, it already had a local ChiNdau name in Mpunga Forest - and local people use the roots for stomach ailments. Though, they all confirm that it only arrived some years back I will have a look on your site.
